About me

I'm a digital product designer with experience in Web, iOS, and Android. I enjoy seeing projects through from research to implementation, and have skills that range from product strategy, to interaction and visual design, to front-end development and AI design.

Experience

Product Designer, [Meta Reality Labs](#), 1 Meta Way, Menlo Park, CA 94025

Seattle, WA – August 2020-May 2026

I focussed on AI experiences on Wearables within Meta's Reality Labs. In my time at Meta I have worked on AI Smart Glasses in a holistic way. Championing multiple devices and individual features from concept phase to launching into the market.

As a Product Designer on wearables, my work has included:

- AI-native feature ideation, design, and execution.
- Leveraging a deep understanding of networked devices in managing the connectivity of the wearables.
- Creating novel interactions and products stemming from this new product category.
- Streaming video from glasses to mobile apps.
- High-fidelity, code-based, technical prototyping of designs to influence product strategy.
- Mentorship of other designers

- Assisting in user research of future product explorations

Senior Product Designer (Design lead), [Clio](#), 300 - 4611 Canada Way, Burnaby, BC V5G 4X3, Canada

Vancouver, BC – March 2019-August 2020

I led the design team for Clio Grow and Client Experience, one of Clio's three portfolios of products. In my time at Clio I designed and conceived of the Clio Scheduler, a product that headlined our large customer conference, grew into a leader on the broader design team by helping to develop the critique process, and participated in Clio's management training program, Basecamp.

As a lead in the portfolio, my responsibilities included:

- Daily design work for multiple feature teams at once
- Facilitate weekly design critiques within my portfolio
- Interviewing and continuously developing our design hiring process
- Driving overall design strategy, larger initiatives, and vision for the portfolio as a whole
- Weekly 1:1's with my reports, helping them to develop and realize their career goals
- Compensation reviews and leave approval
- Determining design resource needs on the portfolio

Lead Designer, [Dooly](#), 560 Beatty St, L110 Vancouver BC V6B 2L3, Canada

Vancouver, BC – Oct 2016-April 2019

I was the first hire at this startup focussed on bringing a consumer-grade experience to enterprise sales software. I was brought on pre-users or revenue and helped grow the business to include dozens of enterprise accounts, including [Asana](#), [Intercom](#), and [Contentful](#), with hundreds of daily active users.

I was the sole designer, responsible for the product design, brand, marketing communications design, and I also contribute to the front-end development.

Lead Instructor, [BrainStation](#), 455 Granville St #400, Vancouver, BC V6C 1T1, Canada

Vancouver, BC – Mar 2017-Present

I lead an Intro to Web Development class once a week in the evenings. In this ten-week course I help all kinds of people get started making things on the Internet.

Product Designer, [Mobify](#), 930 Homer St, Vancouver BC V6B 1T7, Canada

Vancouver, BC – Mar 2014-Oct 2016

I worked as a designer on the Product Team. I designed and developed products to enable the development of mobile-focussed commerce websites. Some of my work there has included:

- Product design and front-end development for a customer engagement platform that included location-based marketing, and behaviour-driven web and app push notification delivery.
- Design and front-end development for a mobile project testing and release console.
- iOS and Android app design for our hybrid app development framework, as well as several client builds including [Ritchie Bros. for iOS and Android](#), and [London Drugs LDEExtras iOS](#).
- Building relationships with the partner developer network, customers, and in-house development teams. Facilitating user testing, interviews, and gathering feedback on our platform.

Education

- Capilano University, North Vancouver, BC – Interactive Design Diploma, 2012-2014
- University of Alberta, Edmonton, AB – Bachelor's of Education (Math major, Art minor), 2004-2009
